

GameSir G7 Pro Zenless Zone Zero Edition controller (grey)

Model: G7 Pro ZZZ

Manufacturer: GAMESIR

EAN: 6936685222892

Product Code: 1003274

R3,582

GameSir G7 Pro Zenless Zone Zero Edition Controller (gray)

The GameSir G7 Pro Zenless Zone Zero Edition is a unique wireless controller for the Xbox console, created in collaboration with HoYoverse. Inspired by the world of gaming, it impresses with its translucent casing and Zenless Zone Zero details. It offers three connectivity modes - 2.4 GHz, Bluetooth 5.3 and USB-C - and full compatibility with Xbox, PC and Android. Equipped with Mag-Res™ TMR magnetic sticks, Hall effect triggers, optical microswitches, additional buttons and four vibration motors, it provides precise control and full personalization through the GameSir Nexus app.

Official Xbox compatibility and three connectivity modes

This fully licensed controller offers a reliable 2.4GHz wireless connection and one-button quick wake-up for the Xbox console. In addition, with support for wired connection and Bluetooth 5.3 technology, the device will also work perfectly with PCs and Android devices. The choice of connectivity mode depends only on your needs and preferred hardware.

GameSir Mag-Res™ TMR professional sticks and advanced triggers

The GameSir Mag-Res™ TMR magnetic sticks used in the controller guarantee smooth and precise control and exceptional durability. Hall-effect analog triggers provide natural responsiveness, while mechanical DIP switches allow you to quickly stop the action for complete control in any situation.

Extended control and full button personalization

The GameSir G7 Pro is equipped with four additional buttons with freely assignable functions. The R4/L4 rear buttons and R5/L5 side mini-bumpers allow for lightning-fast reactions without having to take your fingers off the main controls. All settings can be managed via the intuitive GameSir Nexus app. Completing the control system are optical microswitches in the ABXY buttons and a mechanical D-pad, which offer crisp clicks and faster response times. Four independent vibration motors located in the grips and triggers guarantee a realistic tactile experience, drawing the player into each game scene.

Built-in gyroscope, 3.5mm audio and charging station included

The controller also offers motion control (on PC), enabling more intuitive interaction in games. An integrated 3.5mm jack allows the use of headphones in both wired and 2.4G wireless modes. Included is a practical charging station with an automatic start and stop charging function, which significantly extends the life of the accumulator.

Long-lasting accumulator and compact design
