Connect and charge USB Type-C devices with a rugged right-angle cable

This rugged 1ft (30cm) USB-C right angle cable can be used to connect and/or charge a USB peripheral. Conveniently connect USB-C enabled devices at a right angle to the cable for organized cable routing solutions.

Built for Daily Use

The durable USB charging cable features aramid fiber reinforcement that protects the cable from the stress of frequent bends. This allows the cable to flex without over-stretching or damaging the core components of the cable.

Flexible Strain Reliefs

The USB cable has been designed to prevent cable/connector strain. The extra-long strain relief moldings have been tested to withstand over 5,000+ bend cycles at a 180° angle.

Superior Connection Quality

The durable cable supports all USB specifications up to USB 2.0, providing a dependable connection for USB-C peripheral devices. It supports up to 3A for charging USB-C-enabled devices.
