SATA to USB Adapter Cable | SATA III 6Gbps | 2.5" or 3.5" SSD or HDD | Portable

This SATA to USB cable is an external drive adapter that gives you quick and easy access to a SATA drive through the USB-A port on a USB 10Gbps desktop or laptop.

Faster Transfer Speeds with USB 10Gbps

The USB 10Gbps (also known as USB 3.2 Gen 2) to SATA adapter gives you greater bandwidth and speed with rates of up to 10Gbps. That's twice the speed of USB 5Gbps (also known as USB 3.2 Gen 1 or USB 3.0) and 20x faster than USB 2.0.

You can leverage the high performance of the latest SSDs and HDDs, while alleviating bottlenecks in your data transfers. Plus, you can experience transfer speeds up to 70% faster than conventional USB 10Gbps, when connected to a computer that supports UASP.

Convenient and Versatile Drive Access

The SATA to USB adapter cable lets you swap between drives so that you can copy or retrieve data from an external 2.5" or 3.5" SATA solid-state drive (SSD) or hard drive (HDD). The cable is ideal for IT technicians who need fast access to SATA drives.

It's the perfect solution for:

- Data migrations
- Adding drive space
- Cloning drives
- Creating disk images
- Performing backups and data recoveries

Connect from Anywhere

The SATA to USB adapter is a portable solution that includes an integrated cable so you never have to worry about forgetting to bring your cable with you.

You can easily connect to a 2.5" SSD or HDD using USB power. A universal power adapter is also included for connecting to a 3.5" drive, or for connecting to any 2.5" drive that requires additional power. The adapter is plug-and-play and does not require drivers.
