SATA to USB Adapter Cable | SATA III 6Gbps | 2.5" SSD or HDD | USB 3.0 | Portable

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

This SATA to USB cable is an external drive adapter that gives you quick and easy access to a SATA drive through the USB-A port on a laptop.

Upgrade the Drive on Your Laptop

This SATA solid-state (SSD) or hard drive (HDD) adapter lets you upgrade to an external 2.5" SATA SSD or HDD.

The cable lets you:

- Add drive space
- Perform backups
- Create disk images
- Implement data recovery
- Transfer content between the drive and the laptop

Faster Transfer Speeds with UASP

The cable supports USB 5Gbps data transfer speeds. But, you can experience transfer speeds up to 70% faster than conventional USB 5Gbps, when connected to a computer that also supports UASP. With UASP you can utilize the full potential of a SATA III SSD or HDD. UASP is supported in Windows® 8, Mac OS X (10.8 or above), and Linux®.

In testing, UASP performs with a 70% faster read speed and 40% faster write speed over traditional USB 5Gbps at peak performance.

At the same peak in testing, UASP also shows an 80% reduction in required processor resources.

Connect from Anywhere

The SATA to USB cable is a portable solution that tucks away nicely in a laptop bag -- no external power is required. The cable lets you easily swap between drives with no need to install the drive inside an enclosure. It's plug-and-play and doesn't require drivers.

Note: This product is not compatible with 3.5 in. hard drives. For 3.5 in. drive support, please see our USB to SATA Cable with Supplemental Power (USB312SAT3).
