Sony ECM-LV1 Black Lavalier/Lapel microphone

Model: ECMLV1.SYU

Manufacturer: SONY

EAN: 4548736130777

Product Code: 1252171

R1,438

The versatile lavalier microphone

High-quality digital audio with an unobtrusive design

The ECM-LV1 is a versatile lavalier microphone suitable for a variety of situations and uses. It works with diverse electronic devices and is designed to be visually unobtrusive, so it can be positioned close to the speaker's mouth for optimal audio pickup.

Clear stereo sound

With the ECM-LV1 you don't have to worry about directional microphone placement. The omnidirectional mic capsules at the heart of the ECM-LV1 provide clear, high-quality sound with pickup from all directions.

The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Works in combination with the ECM-W2BT

The ECM-LV1 can make your shooting less stressful when used in conjunction with the ECM-W2BT. Connect the ECM-LV1 to the ECM-W2BT and a camera compatible with Digital Audio Interface for stress-free recording, without worrying about the distance or the direction of the camera.

Ready to use with a variety of devices

In addition to cameras and camcorders, the ECM-LV1 allows flexible use with a number of other electronic devices. It works with devices equipped with an external mic input such as PCs and digital voice recorders.

Sophisticated design

Flexible attachment with a 360-degree rotating clip

The flexible rotating clip lets you attach the microphone at any convenient angle. It allows any orientation from horizontal, for a necktie or lapel, to vertical for a pocket clip.

Simple, unobtrusive design

Small in size at just 32mm in length and 11mm in diameter, the plain black ECM-LV1 is simple in form as well as highly mobile. It's designed to be unnoticeable when attached to clothing, in order to be useful in a variety of shooting situations.

Wind screen to minimise wind noise when shooting outdoors

The ECM-LV1 comes with a wind screen designed to reduce the impact of both wind noise and the speaker's breath sounds. The result is clear and stable sound recording even when shooting outdoors on a windy day.

Battery-free recording
