

Fujitsu PRIMERGY RX2530 M6 server Rack (1U) Intel Xeon Silver 4309Y 2.8 GHz 16 GB DDR4-SDRAM 900 W

Model: VFY:R2536SC080IN

Manufacturer: FUJITSU

EAN: 4065221792048

Product Code: 1072721

R80,628

OPTIMIZED PERFORMANCE AND DENSITY

Ideal dual-socket platform for dense scale-out data center computing powered by latest 3rd Generation Intel® Xeon® Scalable Processors with up to 40 cores per CPU.

POWER YOUR APPLICATIONS

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Combine performance and versatility to adapt to a variety of applications and meet future demands with 32 DIMM modules (16 of which can be PMem) and up to 10 TB of memory. Intel® Optane™ persistent memory provide fast, high capacity and cost effective memory for memory intensive workloads.

EASY EXPANDABILITY

Benefit from the flexibility of 2.5”, 3.5” as well as EDSFF storage drives for highest storage capacities with up to 32 drives per height unit (U) and additional expandability with up to 4 PCIe Gen4 slots flexible DynamicLoM adapters via OCP V3.

COMPREHENSIVE PROTECTION

Benefit from advanced security technologies such as Platform Firmware Resilience (PFR) to protect the most sensitive portions of a workload, encryption support to enhance data and VM protection as well as physical protection to avoid unauthorized access.
