

UBIQUITI SFP+ RJ45 - 10 Gbps Transceiver Module SFP+ 10 5 2.5GB RJ45

Model: UACC-CM-RJ45-MG

Manufacturer: UBIQUITI NETWORKS

EAN: 810084690154

Product Code: 1012684

R2,265

The Ubiquiti SFP+ transceiver module is a high-performance, energy-efficient solution designed to enhance your network's speed and reliability. With support for both 10 Gigabit and Gigabit Ethernet, it offers versatile connectivity options for a wide range of network infrastructures. This module boasts a data transfer rate of 10 Gbps, ensuring rapid transmission of large files and smooth streaming of high-definition content. Its plug-in module form factor allows for easy installation, making it a convenient choice for system upgrades or expansions. Additionally, the module's low power consumption of 1.9 watts not only reduces operational costs but also supports your organization's green initiatives. With a robust design that operates efficiently across a wide temperature range, the Ubiquiti SFP+ transceiver module is suitable for various operational environments, ensuring reliable performance when you need it most.
