TRUTHEAR Nova Wired In-Ear Headphones (Blue)

Discover headphones that will take your music experience to the next level. The TRUTHEAR NOVA is designed for true audio connoisseurs. The earbuds are crafted using 3D printing technology, and each features a hybrid configuration of 1 dynamic driver and 4 balanced armature drivers, delivering sound with exceptional clarity, spatial depth, and naturalness. The combination of innovative technology, thoughtful design, and high-quality materials ensures that their sound delivers a truly unique experience.

Five drivers, one perfect harmony

The TRUTHEAR NOVA features an advanced driver configuration in which each component has a precisely defined role. A 10 mm dynamic driver handles the bass—deep, energetic, and with low

distortion. The midrange and treble are reproduced by two larger, complex armature drivers that blend perfectly with the dynamic driver, ensuring consistency across the entire frequency range. Additionally, a dual balanced armature driver handles the high frequencies, ensuring clarity and lightness. All of this creates a natural and warm sound that captures every detail of the music.

Perfectly Reproduced Sound

The TRUTHEAR NOVA utilizes hybrid crossover technology, which employs precisely calculated acoustic structures and RC crossover. As a result, each of the five drivers operates within its own dedicated frequency range, ensuring smooth transitions between tones and eliminating any phase shifts. The result? A natural, spacious sound that lets you enjoy every nuance.

Extended Frequency Response for Discerning Listeners

NOVA offers an impressive frequency response ranging from 8 Hz to 40 kHz, allowing you to capture sounds that typically remain out of reach for standard headphones. Within the effective range of 20 Hz to 20 kHz, the headphones perfectly reproduce the full spectrum of sound, from deep bass to crisp and clear highs. Regardless of the music genre, NOVA delivers an experience that will delight both music lovers and enthusiasts of technical perfection.

A design that prioritizes comfort and durability

The TRUTHEAR NOVA headphone housing was manufactured using DLP 3D printing technology, resulting in a lightweight and ergonomic design that perfectly conforms to the shape of the ear. The use of medical-grade resin ensures safety and comfort even during prolonged use. Additionally, the aluminum front plate is secured with screws and adhesive, protecting it from damage and ensuring durability for years to come.

Premium-Quality Cable and Versatile Features

The set includes a four-conductor monocrystalline copper cable, which not only improves signal quality but also enhances the durability of the design. The universal 0.78 2-pin connector allows for easy cable replacement, offering users unlimited possibilities for personalization and tailoring the sound to their own needs.

A fit that makes a difference

TRUTHEAR NOVA comes with a wide selection of ear tips—from classic silicone to foam and double-flange tips. Each type of ear tip has unique properties—double-flanged tips minimize high-frequency resonance, delivering even clearer sound, while foam tips enhance comfort and provide an excellent seal.

Included in the set

- TRUTHEAR NOVA earbuds
- Four-core monocrystalline copper cable
- Silicone ear tips (3 sizes: S, M, L)
- Double-flange ear tips (2 sizes)
- Foam ear tips (size M)
- User manual
- Warranty card

Manufacturer	TRUTHEAR
Model	NOVA
Color	Blue
Drivers	1 dynamic + 4 balanced armature (per earbud)
Frequency response	8 Hz – 40 kHz
Effective frequency response	20 Hz – 20 kHz
Impedance	20.5Ω ±15% @1kHz
Sensitivity	123 dB/Vrms @1 kHz
THD	≤1% @1 kHz (94 dB)

Color: blue, Type: In-ear , Cable length (cm): 120, Gross weight: 350, Box length: 16,00, Box width: 15,50, Box height: 4,50, Net weight: 200, Last delivery: 15.09.2026, GPSR Link: https://psr-assets.innpro.pl/audio/sg_audio_headphones.pdf
