

TRUTHEAR Zero Wired In-Ear Headphones (Blue)

Model: Zero Blue

Manufacturer: TRUTHEAR

EAN: 6975462650008

Product Code: 1018111

R1,995

TRUTHEAR Zero Wired In-Ear Headphones (Blue)

You've never seen earbuds like these before! The TRUTHEAR Zero look almost like jewelry, yet they deliver incredible sound. Made using 3D printing technology, they feature dual dynamic drivers that intelligently divide the frequency bands between two specialized circuits. The use of precise frequency-division technology and innovative materials—such as medical-grade resin, a polyurethane diaphragm, and LCP—allows them to deliver balanced sound with powerful bass, detailed mids, and smooth highs. These earbuds are designed for those seeking a combination of high-quality sound and exceptional comfort.

3D Printing Technology and Medical-Grade Materials

The TRUTHEAR Zero earbud housings are manufactured using DLP 3D technology, which has previously been used primarily in high-end multi-driver earbuds. The use of medical-grade resin guarantees not only precision in manufacturing but also comfort and safety. The ultra-thin and lightweight design ensures comfort and durability, while the delicate hand-finishing process adds an elegant touch to the earbuds.

Full-bodied sound in every note

At the heart of the TRUTHEAR Zero is a pair of dynamic drivers that harmoniously divide the frequency bands. The larger, 10-millimeter driver delivers powerful, deep bass—perfect for music where energy and rhythm matter most. The smaller, 7.8-millimeter driver with an ultra-lightweight CCAW voice coil focuses on the midrange and high frequencies, delivering clear vocals and detailed instrumentation. Together, they create a harmonious sound where the bass is distinct but not overpowering, and the higher frequencies remain clear and balanced.

Every detail in its place

The TRUTHEAR Zero utilizes advanced hybrid crossover technology, allowing each driver to operate within its ideally suited frequency range. A specially designed acoustic structure and RC circuit eliminate phase shifts that often interfere with the listening experience in multi-driver headphones. As a result, the sound is natural, cohesive, and faithfully reproduces musical details, while the soundstage becomes more spacious and clear.

Sound tailored to your preferences

The Zero headphones combine powerful, dynamic bass with pleasant and natural midrange and high frequencies. Optimization to minimize distortion (1% @1kHz) ensures that the sound remains clean and balanced even at higher volume levels. The bass is deep but not overpowering—it leaves room for subtle details in the mids and highs. Importantly, the headphones are designed so that their sound remains comfortable even during long listening sessions, offering a relaxing and detailed musical experience.

High-quality cable for clear sound

The headphones feature a four-core, silver-plated cable with an increased diameter, which minimizes interference and ensures flawless signal transmission. The standard 0.78 2-pin interface allows for easy cable replacement, offering additional options for customization and expansion.

Included:

- TRUTHEAR Zero headphones
- High-quality four-core silver-plated cable x1
- 6 pairs of silicone ear tips (thick and thin, sizes S, M, L)
- 1 pair of foam ear tips (size M)
- 10Ω impedance adapter x1
- User manual
- Warranty card

Manufacturer	TRUTHEAR
Model	Zero
Color	Blue
Drivers	Dual dynamic (10 mm + 7.8 mm)
Diaphragm	Composite with polyurethane suspension and liquid crystal polymer (LCP)
Impedance	17.5Ω ± 15% at 1 kHz
Sensitivity	117.5 dB/Vrms at 1 kHz
THD	1% at 1 kHz
Frequency Response	20–40.5 kHz (IEC 61094, free field)
Effective frequency response	20–20 kHz (IEC 60318-4, -3 dB)

Gross weight: 260, Net weight: 100, Box length: 16,00, Box width: 10,00, Box height: 4,50, Last delivery: 15.09.2026, Color: blue, Type: Earbuds , Active noise cancelling ANC: No, Cable length (cm): 150
