MOVA S2 Detect cordless upright vacuum cleaner

Take care of clean surfaces in your home effortlessly. The MOVA S2 Detect upright vacuum removes dirt with 25,000 Pa and offers a long run time. With its mopping function, advanced filtering and accessory kit, the MOVA S2 works well for both daily floor vacuuming and thorough cleaning of furniture, carpets or hard-to-reach areas.

Effectively removes dust

At the heart of the vacuum cleaner is a 460-watt brushless motor that generates up to 25,000 Pa of suction power. This translates into effective removal of dirt not only from smooth surfaces, but also from carpets and rugs. The MOVA S2 can handle both fine dust and larger crumbs or hair. Importantly, thanks to its capacious battery, the device can run for up to 60 minutes using the roller brush, which is enough to vacuum the entire apartment without interruptions for charging.

Vacuuming and mopping

Instead of vacuuming and mopping the floor separately, the MOVA S2 lets you do it in one go. The built-in 300 ml water tank and microfiber pad allow you to vacuum and mop hard surfaces at the same time. The device thoroughly picks up dust and spills, leaving your floor clean and streak-free.

A solution for tangled hair

Many users struggle with the problem of tangled hair and dander in the vacuum cleaner's brushes. The MOVA S2 solves this problem with a special design with a comb located at the shaft. During operation, the brush automatically brushes and collects hair, preventing it from winding up on the roller.

99.9% filtration - cleaner air at home

The MOVA S2 features a 4-layer filtration system with an additional cyclonic dust separator. The whole system provides a filtration efficiency of 99.9%, which means that pollen, allergens and fine particles do not return to the room. This solution is especially useful in homes with children, allergies or pets.

Convenient storage

The MOVA S2 also has the advantage of its clever design. The main tube has a joint that allows you to fold the vacuum cleaner, which allows you to clean under furniture. When you're done, the unit can be easily folded up, and additional accessory holders help keep things organized.

LED backlighting

The brush of the vacuum cleaner is equipped with LED lights that illuminate the area in front of the device. This makes it easy to spot dust and dirt even in dark corners, under the bed or along the walls.

Accessories included

You'll also find interchangeable tips in the kit, including a mini power brush that's great for cleaning furniture, mattresses or upholstery in your car. An additional crevice tip makes it easy to reach tight corners - such as between furniture or behind a radiator.

Intuitive operation and easy maintenance

The vacuum cleaner is equipped with an easy-to-read LED screen that indicates the battery charge level and allows you to quickly change the operation mode. The dust container is emptied at the touch of a button, with no contact with dirt. Importantly, both the filter and the brush can be easily removed and washed, making it easy to keep the equipment in good condition.

Included

- vacuum cleaner body
- battery
- folding tube
- universal brush with illumination
- water container
- mop pad
- mini electro brush
- long brush 2in1
- accessory holder
- anti-collision strap
- charger
- user manual
