HPE PDU Management Modul for Monitored PDU

Model: AF400A

Manufacturer: HEWLETT PACKARD ENTERPRISE

EAN: 882780309005

Product Code: 1183479

R5,055

The HPE PDU management module enables you to monitor and manage power environments through comprehensive control of individual HPE PDUs. The management module can be configured to send alert traps to HPE Systems Insight Manager and other SNMP management programs or used as a standalone management system. This flexibility enables you to monitor and manage with up to two PDUs through the network connector or serial connector located on the front of the management module. The HPE PDU management module provides remote management of a PDU by connecting the PDU directly to the network.
