OBDELEVEN 3 PRO Pack Diagnostic Scanner (200 credits)

OBDeleven 3 is a compact, wireless diagnostic scanner with a 200-credit package that allows drivers to easily analyze, configure, and monitor their cars. Simply plug the device into the OBD2 port, launch the mobile app, and connect via Bluetooth. No cables, no laptop, and no trips to the repair shop—full diagnostics available right from your smartphone!

Full Compatibility and Precision

The device is officially licensed by the Volkswagen Group (VAG), BMW, Toyota, and Ford (U.S. models), ensuring reliable readings and access to all vehicle systems. OBDeleven 3 works with popular brands such as Audi, Škoda, SEAT/CUPRA, MINI, Rolls-Royce, Lexus, Ford, and many others,

providing drivers with global compatibility and the highest diagnostic accuracy.

Faster Communication and Broader Capabilities

Thanks to its second-generation 5x CAN-FD interface, OBDeleven 3 supports modern vehicle systems with greater speed and accuracy. This means faster scanning, greater compatibility with new models, and more comprehensive control over the car’s functions. The device also features a power-saving mode, so you can safely leave it plugged into the OBD2 port permanently—without the risk of draining the battery.

Simple, step-by-step operation

To get started, simply plug the OBDeleven 3 into the OBD2 port, download the mobile app (Google Play, App Store, or AppGallery), and pair the device with your phone via Bluetooth. The entire process takes just a few minutes, and the app will intuitively guide you through the setup.

Real-Time Diagnostics and Data

OBDeleven 3 allows you to scan, read, and clear engine, transmission, and other system codes in vehicles equipped with a CAN bus (model year 2008 and newer). For VAG, BMW, Toyota, and Ford vehicles, advanced diagnostics for all vehicle systems are also available, enabling detailed fault analysis. Users can also monitor real-time data such as engine RPM, coolant temperature, and oil temperature.

Customization and Programming Features

Thanks to the One-Click Apps feature, users of Volkswagen, BMW, Toyota, and Ford vehicles can easily adjust comfort and safety settings, reset service reminders, or activate hidden features—all with just a few taps on the screen. More advanced users can take advantage of manual coding and adaptation (for VAG vehicles), which provides full control over the car’s systems.

Vehicle Data and Additional Features

OBDeleven 3 provides instant access to key vehicle information—such as the VIN, model year, mileage, engine code, and body type. For vehicles from the Volkswagen Group, BMW, and Toyota, the app also displays factory components and equipment options, such as the engine, transmission, battery, and more. OBDeleven 3 also offers monitoring of hybrid and electric batteries (for Toyota and Lexus)—allowing you to monitor cell temperature and balance in real time. Additionally, the Car Buying Assistant feature helps when purchasing a used car by allowing you to verify the vehicle and identify potential issues before buying.

Full Control with the PRO Plan

The OBDeleven 3 PRO annual plan is a solution designed for drivers who want to manage their cars like professionals. It offers not only comprehensive diagnostics and access to all vehicle systems, but also manual coding and adaptations for Volkswagen Group vehicles, allowing you to precisely tailor the car’s features to your own needs. You can enable or disable selected features—from lane-keeping assist to comfort turn signals—as well as make detailed adjustments to the operation of lighting and comfort systems. The PRO Plan also unlocks unlimited hybrid battery tests, which allow you to monitor cell temperature and balance in real time, enhancing safety for drivers of Toyota and Lexus hybrid and electric vehicles. Additionally, users gain access to priority technical support directly within the app, ensuring that every question or issue is addressed first. This plan is for those who don’t want to limit themselves to simply reading error codes, but want full control over their vehicle’s settings. With your purchase, you’ll receive 200 credits to get started.

Manufacturer	OBDeleven
Model	OBDeleven 3
Communication Interface	Bluetooth
Supported Protocols	CAN, CAN-FD
Power Supply	OBD2 ports (12 V)
Power-saving mode	Yes
