R1,731

BOSCH EXPERT SHEET METAL HOLE SAW FOR LONG LIFE CUTTING HOLES IN STAINLESS STEEL

Cutting holes in sheets of steel is not like other hole saw applications. In industrial settings, or when working on vehicles, you have to be extremely precise – but at the same time the material is hard and destroys traditional BiMetal hole saws. The EXPERT Sheet Metal solves all these issues in one compact piece of high quality engineering.

This hole saw packs all the best qualities into its short stature: it is long lasting, accurate, and optimised for quality sheet metal work.
