wherever you go.

Low-Latency

Wireless Audio

Gaming mode can be activated with a simple touch or via Armoury Crate, enabling low-latency connection and greater synchronization between audio and video playback for competitive gaming.

Active Noise Cancelation for Full Immersion

Hybrid Active Noise Cancelation (ANC) detects and filters out noise coming from both inside and outside of the headphones, enabling an immersive audio experience that leaves you undisturbed when you’re jamming to your favorite beats or taking on missions in your favorite game.

Exceptional Audio

Specially tuned 10 mm ASUS Essence drivers and airtight chambers provide rich, clean sound, particularly in the mid and high frequency range, while powerful bass lets you enjoy true-to-life audio.

Extensive Battery Life with Fast Charging

With ANC off, you can enjoy up to 5.5 hours of use on a single charge and extend that by up to 21.5 extra hours with the charging case. When you’re in a jam, just 10 minutes of charging gives you up to 1.5 hours of usage thanks to quick-charge technology.

Water Resistance

IPX4 splash-proof water resistance adds protection and extra durability.

Instant Control at Your Fingertips

Simple quick-touch controls at the tips of your fingers enable rapid in-game adjustments.

Armoury Crate
