Expand your desktop to two external DP monitors or connect projectors or television to your notebook, tablet or PC via a new USB-C or Thunderbolt 3 connector. The adapter supports 1x 8K / 30 Hz or 2x 4K / 60 Hz*.

Using is very simple, just plug the adapter into the USB-C, USB4 or Thunderbolt 3/4 port on your computer, connect it to a display device via DP cable and you can immediately start using. Driver installation is automatic from the system.

*Note: macOS operating system does not support Multi-Stream Transport (MST) video transfer technology, which means that if connected to macOS, the same image will be projected on both connected monitors.
