

Philips VoiceTracer Black, Grey

Model: DVT8115

Manufacturer: PHILIPS

EAN: 855971006939

Product Code: 494660

R4,909

Exceptional recording, shared instantly

with automatic speech-to-text

Capture every meeting in excellent, noise-free audio quality. Simply place the 360° meeting microphone on the table and press record to capture all speakers, from every angle. Combined with Sembly’s AI Speech-to-Text Cloud Software, you can even turn your recordings into text quickly and accurately. Simply upload your files to Sembly when you are back at your computer and let it automatically convert your recordings to text for you.

360° recording for perfectly documented meetings

The innovative full-radius meeting recorder captures everyone’s ideas in excellent audio quality no matter where they are seated at the table. The meeting microphone’s boundary layer design uses dynamic acoustic pressure to provide excellent sound and recording quality with a full 360° sound pick-up.

24 bit/96 kHz quality recording for capturing every detail

The VoiceTracer captures audio in spectacular 24 bit/96 kHz. This uncompressed recording makes sure you capture every beat in the most natural and crisp audio quality possible.

8 GB internal memory for up to 88 days of recording

Capture and store up to 88 days of continuous recording thanks to the 8 GB of internal memory. A microSD memory card slot for up to 32 GB of additional memory guarantees virtually unlimited recording capacity.

Smart recording and playback functions for best recording results

Smart recording functions make it even easier to achieve stunning audio results. The pre-recording and timer functions make sure you don’t miss a single bit. Voice-activated recording is a convenient feature for hands-free recording which pauses recording when you stop speaking and resumes automatically when you begin speaking again. Recordings can be edited by overwriting a part or adding a new recording at the end. Long recordings can be split automatically or manually into separate files for easier editing or sharing. Smart playback functions, such as bookmarks and filters, also make it easier and quicker to find the recording you are looking for.

Rechargeable Li-ion polymer battery for extra-long recording

The high-capacity Li-ion polymer battery can be easily charged through a standard USB C jack. This guarantees extended battery life for extra-long recording up to 36 hours, ensuring that your recorder will always be ready to work when you are.

Pouch and convenient wire storage system for adjusting cable length

The wire storage in the meeting microphone allows you to adjust the length of the cable to make sure your desk always looks tidy and professional. The high-quality pouch allows you to safely store and transport your entire meeting recorder set.

Free smartphone app for remote audio control

Control your audio recorder using your smartphone, even from a distance. The Philips VoiceTracer app makes recording events such as lectures much easier and more convenient. You can place your recorder in the front of the room near the speaker, take a seat at the back, and still control recording comfortably and without interrupting the lecture. The Philips VoiceTracer app can be downloaded for free from the Apple App Store or Google Play Store.

Large color display for clear recording status information

The large color display offers sharp images, making it easier to see and read everything at first glance. The clear user interface supports seven languages and is optimized for easy, intuitive operation.

Audio scences for automatic perfect audio settings in any situation

The Philips VoiceTracer comes with preset scenes which automatically adjust the recorder’s audio settings depending on what you want to record, whether it is notes, audio for speech recognition, interviews, lectures, music or meetings.

Automatically convert your recordings to text, up to three times faster than typing

Put an end to tedious typing and create text documents directly from recorded audio files. Using the Sembly Speech-to-Text Software is at least three times quicker than typing up the document yourself. Simply record your notes, interviews or meetings, upload them to Sembly, and receive a written document almost instantly.

Automatic meeting minutes with multi-speaker transcription for easy following up

If you want to record meetings, Sembly Speech-to-Text Software creates automatic meeting minutes, so you can focus on your conversation and not get distracted by having to take notes. Thanks to multi-speaker identification you can clearly identify who said what.

Easily share your voice or meeting recordings with colleagues, family or classmates

Sembly allows to save transcriptions on your computer in PDF or markdown format. You can easily share your voice recordings and transcripts with colleagues, family or classmates by simply sending them a link. For increased privacy, you can add a password to your link.
