

Moza Racing R3 Racing Wheel and Pedals for PC

Model: RS074

Manufacturer: MOZA RACING

EAN: 6973137270711

Product Code: 1682970

R7,427

The MOZA R3 DD Base - combines innovation and precision to deliver a versatile racing experience. Built with aviation-grade aluminum alloy, its durable X-shaped design ensures enhanced cooling and long-lasting performance. The 3.9Nm Direct Drive motor offers ultra-low torque ripple and groove characteristics for smooth and responsive steering feedback.

Equipped with an advanced 15-bit encoder and intelligent temperature control system, the R3 DD Base guarantees consistent accuracy and reliability, whether you’re using a compact desktop setup or a fully equipped racing rig. Its adaptability and high-quality engineering make it the perfect foundation for an immersive and precise racing experience.

The MOZA ES Lite Steering Wheel - features ISF grips, an aluminum alloy framework, and MOZA’s racing-grade quick-release system for effortless wheel swaps. With RGB shifter light indicators and 22 programmable buttons, it offers dynamic control and complete customization.

The MOZA SR-P Lite Pedals - are engineered with high-strength steel and ultra-sensitive angle sensors for precision footwork. Adjustable spacing and output curves via MOZA Pit House software allow for a personalized driving experience.

The MOZA Desk Clamp - is a robust and versatile solution for securing your MOZA R3. Crafted entirely from durable metal, it provides exceptional stability and reliability during intense racing sessions. Designed to adapt seamlessly to both desktop setups and dedicated rigs, the desk clamp ensures a secure fit while maintaining flexibility for different gaming environments.
