Experience Smoother Screen Movement with a 120Hz Refresh Rate. Ideal for professional tasks like data scrolling, document review, and content creation. The enhanced fluidity supports precise work and helps maintain focus during intensive workflows.

Because contrast ratio impacts accurate color representation, Nano IPS Black enhances the contrast ratio from the standard IPS 1000:1 to 2000:1—delivering vibrant colors and sharper detail in objects, shadows, and backgrounds. Experience deeper blacks and richer shadows that remain consistent color expression on the screen from edge to edge, and a heightened sense of realism that conveys your visual outputs naturally.*Nano IPS is an advanced IPS technology that uses nanometer-sized particles on the screen's LED.

One connection. Efficient workflow.

Thunderbolt™ 5 enables the production of commercial outputs such as financial dashboards, control room visuals, and enterprise-grade content on an outstanding 5K2K display.

Connect your laptop, camera, tablet, or external storages through versatile ports including Thunderbolt™ 5, HDMI 2.1, and USB-C and USB-A. Get smooth and stable performance without extra adapters or splitters.

Thunderbolt™ 5 ports support daisy chaining for streamlined setup. Output video, transfer assets, and connect multiple devices – all through a single port. Say goodbye to tangled cables and keep your workspace clean and ready.

The integrated docking station lets you connect power, data, video, and peripherals directly to the monitor through a single hub. Built-in KVM allows control of two PCs with one keyboard and mouse—perfect for IT professionals and business users aiming to reduce clutter and boost productivity.

Expand your creative scope.

Dive into your content and let the action surround you. Dual 10W built-in speakers with Rich Bass deliver clear, immersive sound, ideal for calls, meetings, and video content without the need for external speakers.

A 3-sided borderless screen with a slim stand that seamlessly adjusts to your needs: tilt, raise, and pivot for personalized comfort. By adapting to your workflow, it helps you stay comfortable and focused during long, intensive projects.
