A lot of the other brackets which can tilt forwards and also pivot/swivel left and right are quite bulky and can't fold up very compactly, making it hard to position your TV close to the wall. This bracket doesn't have that problem: it can fold back to within 54mm from the wall.
Its ultra slim design makes it easy to handle and quick to place, but at the same time has a robust structure capable of supporting the monitor up to 35 kg in weight.

- Low profile design matching the new slim LED TVs
- New tilting system for achieving -2 to +12 angle adjustment
- Decorative sleeves on the arms for better cable management and nice appearance
