R2,939

Expressive control for your creativity

ProArt Keyboard KD300 is a 26.8 mm-slim, 65% low-profile keyboard with navigation keys and a premium aluminum top cover. This versatile keyboard features tri-mode connectivity to support up to five devices simultaneously via 2.4 GHz wireless, Bluetooth® and USB. For convenience, ProArt Keyboard KD300 has a PC/Mac toggle switch, a storage slot for its magnetic dongle, and an innovative touch panel for intuitive control of volume, media playback and lighting. Meanwhile, the web-based ASUS Gear Link interface allows you to customize profiles, key mappings, macros and lighting to personalize the keyboard for your creative workflows. ASUS RX Red Low-Profile optical

switches deliver smooth, fast, and precise keystrokes, while two adjustable keyboard tilt angles ensure an ergonomic typing position.

Inspiring endless creativity

ProArt Keyboard KD300 incorporates navigation keys into its compact 65% low-profile layout to keep footprint dimensions down to a minimum, enabling creators to maximize desk space for cameras, sketches, and other tools. Boasting a slim 26.8 mm profile and premium aluminum top cover, ProArt Keyboard KD300 combines refined aesthetics with durability.

Seamlessly switch between devices and systems

ProArt Keyboard KD300 features tri-mode connectivity to support up to five devices via 2.4 GHz wireless, USB, and Bluetooth — including laptops, PCs, and tablets.1 You can switch effortlessly between devices, and toggle the dedicated PC/Mac switch to instantly adapt the keyboard layout to your preferred operating system. Additionally, a built-in magnetic dongle storage slot offers a convenient and secure way to keep the dongle within easy reach.

Intuitive control at your fingertips

You can use the built-in touch panel and multi-function switch to adjust volume, control media playback, and customize keyboard lighting — giving you effortless control right at your fingertips. The web-based Gear Link offers more in-depth customization options to tailor the keyboard to suit various creative workflows.

Ultimate customization for creative workflows

Gear Link seamlessly integrates system and lighting controls, allowing you to easily create, define, and customize scenario profiles, key mappings and macro recordings.
AI hot keys provide ten preset showcards for Adobe shortcuts for seamless creative workflows2. You can also use Gear Link to customize shortcuts that match your working style. Use the Macro feature to assigns complex actions to a single key. You can also effortlessly adjust volume, media playback, keyboard lighting, or perform a customized action — all with a gentle swipe of the touch panel.

Ergonomic design

Engineered for comfort, ProArt Keyboard KD300 offers 4.5°-flat and 8°-angled tilt positions to relieve pressure off your wrists for comfortable typing. In addition, red low-profile switches provide fast 1.0 mm actuation, a smooth linear feel, and responsive 40–55 gram-force key feedback — making every keystroke instant and precise.

Smooth and precise keystrokes

ASUS RX Red Low-Profile optical switches deliver quick, responsive input with a smooth, linear feel. The switches are designed to minimize accidental presses while offering satisfying rebound, so every keystroke feels effortless and precise.

2-level adjustable kickstands

ProArt Keyboard KD300 has two pairs of keyboard feet of different heights, giving it two ergonomic tilt angles to suit your preferences.

Integrated sound dampening

Two layers of integrated silicone dampening foam absorb pinging noises and echoes for improved keystroke acoustics.

Battery levels at a glance

A quick glance at the top row of keys shows the keyboard’s battery level in real time. Each key from Esc to 9 represents 10% of battery life, and emits a vibrant white glow when above 20% capacity. When the battery falls below 20%, the Esc to 1 keys light up in red to indicate a low-battery status. ProArt Keyboard KD300 delivers extended endurance — up to 16 months with RGB lighting off, and up to 100 days even with full-brightness lighting — so you can focus on creating without worrying about battery life3.
