R14,203

Effortless, Hands-Free Cleaning—Every Time

No need to touch dirty water or messy mops. The station handles mop washing, drying, dust disposal, and detergent refills for you.

60° C

Hot Water Mop Washing

Cleans stubborn stains from mop pads with hot water—no scrubbing required.

50° C

Warm Air Drying

Dries mops automatically to speed up maintenance and prevent odors.

Engineered for Pet Hair. Built for 0 Tangles.

Handles hair from every angle so you never have to deal with jams, wraps, or stuck wheels again.

Tangle-Free Cutting Brush

Cuts away wrapped hair only when at the base station – protecting carpets and pets while vacuuming.

Anti-Tangle Side Brush

Unique spin pattern sheds hair before it tangles.

Anti-Tangle Caster

Built to keep rolling—resists hair buildup and keeps performance consistent.

Shiny Floors Without the Elbow Grease

Dual spinning mops apply high-speed pressure to scrub away stains and leave your floors polished.

No Streaks or Dry Spots

A built-in 95ml tank keeps the mop evenly moist so every wipe leaves an even, streak-free shine.

Smarter Avoidance, Safer Navigation

Dual-Laser Precision Avoidance uses both front and side lasers to detect obstacles in real time—minimizing bumps, protecting furniture, and keeping the robot on a smooth, efficient path.

Pet Zones for Extra Care

Set feeding or litter zones in app to boost suction in designated areas. You can also increase dust collection frequency to reduce buildup of pet hair and debris.

Intelligent Carpet Care Technology

Automatically detects rug type and adjusts to thoroughly clean, while protecting carpet fibers.

One Setup, Fully Personalized Cleaning

Just simply setting up your furniture and layout, Perfect Fit Mode will automatically adapt the optimal cleaning mode and path based on your home environment.
