Control a DisplayPort-equipped computer or KVM switch up to 300m (985ft) away over fiber-optic cable

The Fiber Optic KVM Extender allows for control of a KVM switch, console, or PC from a distance of up to 984ft (300m).

## 4K 60Hz DisplayPort Video

The transmitter/receiver kit extends 4K 60Hz DisplayPort video, supporting UHD resolutions up to 3840x2160 at 60Hz (4:4:4). It is DP 1.2 compliant and includes EDID pass-through for real-time display information, ensuring optimal signal quality and compatibility.

## Universal Compatibility

The KVM Console Extender does not require any drivers or software for installation. The point-to-point fiber connection eliminates the need for configuring or managing network settings. The extender is compatible with all operating systems, including Windows, macOS, and Linux. The SFP+ slots support both single and multi-mode MSA-compliant modules.

## Built-In USB Hub

Three USB ports allow users to connect peripherals such as a mouse and keyboard, ideal for remote control of source devices, flexible workstation setups, and collaborative multimedia environments.

## Durable Design

The extender has a sturdy steel chassis and uses fiber-optic extension to reduce electromagnetic interference (EMI), improving stability and ensuring long-term reliability. Its rugged design makes it suitable for installation in various environments.
