AI Auto Tracking PTZ Camera

The PTC330UV2 AI Auto Tracking PTZ Camera makes powerful and reliable Pro AV capability available to everyone. Drawing inspiration from the AVer Professional PTZ Camera family, the PTC330UV2 features in-house AI functions like Presenter Mode, Zone Mode and Hybrid Mode auto tracking, thanks to Human Detection processing. Combine the 30X Optical Zoom lens and 4K resolution with hybrid auto tracking and smooth PTZ functions for broadcasting, streaming, or recording. Your exciting journey of audio and video capturing starts here!

Upgrade Your Cameras to NDI®!

Upgrade your AVer cameras with NDI®|HX. A separate NDI®|HX license key is required for each camera, and internet connection is required for initial activation.

4K Output Resolution

Equipped with 4K resolution, the PTC330UV2 provides ultra-precise auto tracking. The PTC330UV2 also features a Sony sensor that maintains a truly impressive video performance through every frame of your production.

30X Optical Zoom & 12X Digital Zoom

The zoom power of the PTC330UV2 camera reaches an incredible 360X (30X optical and 12X digital zoom). It works even while the camera is panning and tilting, allowing you to highlight content and rapidly change shooting angles. Operate a closer and clearer video feed with the unbeatable PTZ performance of the PTC330UV2.

Human Detection AI

Welcome AVer’s most advanced AI tool yet—Human Detection. This highly accurate processing function enables PTC330UV2 to easily detect and capture human forms and moving objects in seconds. Never miss a tracking target again.

Click & Track

With the PTC310HWV2, you can simply click on a target to quickly adjust the shooting angle and initiate precise tracking, ensuring you can redirect in an instant. This advanced feature is easy for anyone to operate via both remote control and intuitive Web UI.

Presenter Mode

Track your target everywhere with Presenter Mode. This feature gives presenters the flexibility to leave the stage and interact with the audience, all while being continuously tracked. The camera

stays locked on its target, even if other people or objects get in the way.

Zone Mode

Zone Mode enhances your ability to capture content on multiple displays. Create up to four Content Zones to steadily capture the content on display rather than the presenter’s movements.

Hybrid Mode

Hybrid Mode provides the utmost freedom of movement for performing artists. Use preset areas for segment tracking to have the camera automatically snap to a full view of each preset location as the artist moves between it. If the artist leaves the preset areas, the camera seamlessly transitions to tracking mode and follows the artist wherever they go.
