

HiBREW G5 electric coffee bean grinder

Model: G5-black

Manufacturer: HIBREW

EAN: 6975702150305

Product Code: 1034399

R3,861

HiBREW G5 electric coffee grinder.

Enjoy every cup of aromatic coffee! The HiBREW G5 is the grinder for those who refuse to compromise on the quality of their favorite beverage. Precise 36-stage grinding settings, an advanced residue elimination system and slow grinding technology allow you to extract the full flavor from every bean. It's a machine made for enthusiasts who value control over the brewing process and want to achieve perfect results - from espresso to French press.

Barista-level precision

Whether you're making thick, aromatic espresso, delicate drip coffee or classic French press, every cup will be perfect. The HiBREW G5 offers up to 36 degrees of grinding control! You can precisely adjust the coarseness of the ground beans for each brewing method, getting the full flavor and aroma.

Speed to suit your needs

The advanced inverter motor allows you to choose between slow (400 rpm) and fast (500 rpm) grinding. Slow grinding minimizes the heating of the beans, which preserves their full aroma and essential oils. The fast mode is ideal when you need to quickly prepare perfectly ground coffee without sacrificing quality.

Stainless steel grinds

The HiBREW G5 grinder is equipped with high-grade 48-millimeter conical grinds, made with CNC technology. They are characterized by excellent wear resistance and exceptional grinding precision, so that each coffee bean is ground evenly without overheating.

Nearly zero coffee loss

Thanks to the air blowing system, the grinder almost completely eliminates coffee residue after grinding. This means that each new batch of coffee is always fresh, and the aroma remains pure and intense. No more embedded residue that can affect the taste of your brew!

No more spilled coffee

The modern electrostatic coating inside the machine prevents ground coffee from settling on the walls and spilling particles. This keeps grinding cleaner and grinder cleaning to a minimum.

Ergonomic construction and modern design

The HiBREW G5 grinder is distinguished by its sturdy, compact construction and modern design. The 15-degree angle of the housing makes it easy to use and accurately dispense ground coffee. It is a solution that increases comfort and makes the preparation of your favorite beverage a real pleasure.

Included

- HiBREW G5 electric bean grinder
- Coffee bean hopper
- Container for ground coffee
