MPG msi arsenal gaming

MSI's premium MPG series is engineered for gamers who demand strong performance and sleek design. Each product showcases cutting-edge aesthetics and vibrant colors, reflecting MPG's commitment to exceptional design. With optimized configurations, MPG creates a visually striking and powerful gaming experience that leads the trends.

Clean lines. Seamless form

The MPG CORELIQUID P22 Series carries forward the minimalist design of the MPG CORELIQUID P13 Series. While preserving the original elegant aesthetics, subtle new accents have been added to give the product a sharper, more youthful edge. It also features decorative EZ Cap that perfectly conceal exposed hardware, ensuring a cleaner and more streamlined visual presentation.

2.1’’ LCD

The MPG CORELIQUID P22 series elevates system customization with its high-definition 2.1" circular LCD. Delivering vital system data in real-time with a sharp 540x540 pixel density, it ensures that your hardware stats are always legible and vibrant. Choose from a diverse range of MSI-designed themes to create a look that is truly your own.

MSI EZ DISPLAY

Customize your display effortlessly with the standalone MSI EZ DISPLAY software. Bypass MSI Center and directly access four dynamic themes, font color adjustments, and custom media uploads to make your setup stand out.

Screwless Copper Base

The Screwless Copper Base features a perfectly smooth, seamless contact surface without any visible screw holes. This design minimizes the risk of thermal paste getting trapped in recesses, ensuring a cleaner application and better contact. Internally, it is equipped with 0.1mm micro-channels that significantly expand the surface area to rapidly and efficiently dissipate heat from the CPU.

CycloBlade 7

MSI's CycloBlade 7 fan combines a hybrid blade design, delivering powerful airflow and high static pressure. This ensures extreme cooling performance during intense gaming while maintaining low noise levels for an immersive experience. Additionally, the ARGB lighting effects make your rig stand out on the battlefield, making it the ultimate choice for esports players.

Evaporation Proof Tubing

The MPG CORELIQUID P22 series utilizes nylon-braided EPDM water cooling tubes, offering high and low-temperature resistance, corrosion resistance, excellent flexibility, and anti-aging properties. This design not only reduces the evaporation of the coolant but also makes it easy for players to install without worrying about bending or positioning the tubes.

HIGH THERMAL DISSIPATION

This high-performance liquid cooler features 12 widened water channels, increasing water flow by 25%, even with a maintained thickness of 27mm, delivering more efficient cooling performance. The radiator's FPI (fins per inch) reaches an impressive 20, further expanding the cooling surface area. This design not only significantly enhances cooling efficiency but also ensures stable, powerful cooling under high loads and overclocking conditions. Performance enthusiasts can push for maximum performance without thermal limitations, unlocking even greater potential.
