Easy installation

With the simple and easy installation of our server racks, you save time and effort, allowing you to focus on more important tasks. Regardless of your level of experience, you can get your data center or server network up and running quickly.
Our racks come with clear paper installation instructions that guide you through the process step-by-step. In addition, in an effort to ensure the highest quality of use, we also provide detailed video instructions that are available online. So you can be sure you have access to a visual guide to help you understand and complete each step.

Solid workmanship

Reliability and durability are key features of Lanberg server racks. Our rack cabinets are designed to provide rugged construction and reliability depending on the application. Made from high-quality cold-rolled steel, our server racks offer not only great durability, but also the highest precision manufacturing.
Each Lanberg rack features a robust design that is the result of an advanced manufacturing process that combines innovative solutions and careful craftsmanship. We take care of every detail, ensuring excellent protection of cartons and high-quality painting with a matte surface, which emphasizes the professionalism of our products

Flat Pack

Our Lanberg server racks are packaged in a "Flat Pack" format for self-assembly. Thanks to this, you can easily transport our racks in vehicles with limited cargo space, as well as have full control over the assembly process.
Our years of experience in the market have given us a great understanding of how to protect components in cartons to minimize the risk of damage during transportation. We use high-quality protective materials and careful packaging to ensure that your server racks arrive in perfect condition - ready for assembly right away.

Efficient cooling

Lanberg WF01 series of server cabinets is also dedicated to those who are looking for solutions for use in demanding temperature conditions. Our cabinets allow you to achieve optimal performance without sacrificing functionality, aesthetics and security.

By using two vents in the ceiling panel, we ensure excellent airflow and effective cooling. We offer users even greater control over the temperature inside the cabinet, which is key to maintaining optimal operating conditions for equipment.
