notes.

Instant meeting summary so you know the outcome of every meeting at one glance

Shortly after a call, the transcript of the conversation will appear in the Sembly app, which you can read, search, and share as needed.

Automated meeting action points for saving time

Sembly’s smart AI tracks actions, issues, requirements and more to help you zoom-in on key items, in case you missed something during your call or just want to confirm specific details from the discussion.

Voice ID for clear speaker separation

Sembly offers advanced features such as the revolutionary VoiceID algorithm, which identify speakers in meetings and is able to separate the transcripts per person to see who said what. Each speaker is assigned their own virtual "voice fingerprint".

Sembly works with all major platforms such as Microsoft Teams, Google Meet and Zoom

Sembly connects with all major platforms, such as Microsoft Teams, Google Meet and Zoom. Sembly automatically syncs with your Google or Outlook calendar. You can also invite Sembly to an unscheduled call at any time.

4k high-definition camera for remarkable clear video and accurate color reproduction

The camera shows speakers in remarkable clear 4k video with accurate color rendition. The 1/2.8 inch CMOS sensor ensures bright, clear video and sharpness even in low light settings.
