DarkFlash TH285 PLUS Computer Case + 8 Fans (White)

The DarkFlash TH285 PLUS is a spacious ATX computer case with tempered glass on three sides, allowing you to showcase your components and build a sophisticated setup. It supports ATX, M-ATX, and ITX motherboards, graphics cards up to 410 mm in length, and CPU coolers up to 160 mm in height. The package includes 8 black L10 fans, and the design also allows for the installation of radiators up to 360 mm in length. It also features a USB Type-C port with data transfer speeds of up to 10 Gbit/s, an adjustable graphics card bracket, and the option to use an optional V92 LCD screen with customizable content.

Panoramic view of the components

The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The three-sided tempered glass design provides a wide, unobstructed view of the computer’s interior, making it ideal for showcasing elaborate hardware configurations. The minimalist esports design complements the case’s black finish and allows the installed components to stand out. The model’s overall dimensions are 424 × 285 × 448 mm, and the case itself measures 420 × 285 × 430 mm, providing ample space for component selection.

8 fans and extensive cooling options

The kit includes 8 L10 Black fans, allowing you to take full advantage of the intended ventilation system. The case offers space for three 120 mm fans or two 140 mm fans on the side, two 120 mm fans at the rear, and three 120 mm fans at the bottom. The design also supports 240, 280, or 360 mm radiators on the side and 240 or 360 mm radiators at the bottom. Ventilation openings at the rear of the side panel and on the bottom support airflow and enable the creation of an efficient cooling system.

Space for Large Components

The Darkflash TH285 PLUS accommodates graphics cards up to 410 mm in length and CPU coolers up to 160 mm in height, allowing you to use large components. The adjustable GPU bracket can be adapted to cards of varying thicknesses, providing additional stability for heavier designs. The case also features 7 PCIe slots and a removable multifunctional bracket that supports up to three SSDs and two HDDs. There is additional space at the bottom for one HDD or SSD.

Quick Access to the Interior

The quick-release design makes it easy to assemble the computer, replace components, and perform future maintenance. The hand-tightened screws minimize the need for additional tools, and individual case components can be conveniently removed. After unscrewing the screw, the top panel slides to the left; the front panel can be lifted upward; and the rear cover can be slid to the right. After unscrewing the mounting, the glass panel should be tilted away from the bottom and lifted, providing easy access to the entire interior.

Modern Connectors and the Optional V92 LCD Screen

The I/O panel features USB Type-C, USB 3.0, USB 2.0, and HD Audio, ensuring that the most important connectors remain easily accessible during everyday work and entertainment. The USB Type-C port supports data transfer speeds of up to 10 Gbit/s under the USB 3.1 standard—for optimal performance, use a motherboard that supports USB Type-C. The design also allows for the use of an optional V92 LCD screen, which can display custom content. The case is also equipped with a magnetic cover.

Manufacturer	Darkflash
Model	TH285 PLUS
Color	White
Supported Motherboards	ATX / M-ATX / ITX
Case Material	0.7 mm SPCC
Case Dimensions	420 × 285 × 430 mm
Overall Dimensions	424 × 285 × 448 mm
Box Dimensions	520 × 358 × 515 mm
Maximum Graphics Card Length	410 mm
Maximum CPU Cooler Height	160 mm
PCIe slots	7
SSD/HDD support	3 / 2
Side fans	3 × 120 mm / 2 × 140 mm
Rear fans	2 × 120 mm
Bottom fans	3 × 120 mm
Maximum number of 120 mm fans	8
Included fans	L10 Black ×8
Side radiator	240 / 280 / 360 mm
Bottom radiator	240 / 360 mm
Supported heatsink	DE360
USB Type-C	1
USB 3.0	1
