Godox AD200Pro II Flash

The Godox AD200Pro II is a compact 200 Ws flash that combines portability with high performance and versatility. It offers a wide power adjustment range from 1/512 to 1/1, a guide number of 60 m, and a recharge time of just 1.8 seconds, allowing you to efficiently capture both single shots and dynamic photo sessions. The kit includes two upgraded H200 II and H200J II heads equipped with Bi-color modeling light, providing greater flexibility when working in various lighting conditions.

Two Heads for Even Greater Flexibility

The AD200Pro II is equipped with the improved H200 II and H200J II heads, which expand the flash’s capabilities during photography. The new design ensures more effective cooling, allowing the unit to maintain high performance even during long burst sequences. Both heads are compatible with earlier models, making it easy to expand your existing kit and use your current accessories.

Adjustable Bi-color Modeling Light

Both heads feature an LED modeling light with adjustable brightness and Bi-color color temperature, allowing you to easily adapt the lighting to current shooting conditions. A maximum brightness of 1,400 lux at a distance of 1 meter makes it easy to assess the lighting effects before taking a photo. A fully charged battery provides up to 6 hours of continuous modeling light operation, increasing comfort during long sessions.

Quick Setup and Convenient Operation

Working with multiple lights is made easier thanks to the group color indicator and the ability to instantly pair with the Godox X3 trigger. This solution streamlines lighting organization and allows for faster management of individual light groups. An additional convenience is the modern LCD screen with a clearer interface and a flash duration preview function at every power level, which makes it easier to monitor settings while working.

Extensive System Expansion Capabilities

The Godox AD200Pro II remains fully compatible with accessories from the AD200 series, allowing you to easily adapt the setup to various photographic applications. The flash is compatible with the H200R, R200, and S-200 heads, as well as Bowens light modifier mounts using the S2 adapter. Additionally, you can connect the PB960 battery to extend runtime during demanding shoots.

Included

- Godox AD200Pro II flash x1
- H200 II head x1
- H200J II head x1
- Flash trigger x1
- AD-E2 mount x1
- Battery x1
- Charger x1
- USB cable x1
- Carrying case x1
