supports projectors weighing up to 20 kg reliably and safely - even with regular use.
Thanks to the tiltable and rotatable design, the mounted projector can be precisely aligned: +/- 15° tilt and 360° rotation enable precise image projection onto any screen. The flexible mounting arms support hole patterns with diagonals from 16 to 33 cm, ensuring a high level of compatibility with common projector models.
The integrated security lock protects the device from unauthorized access - a decisive advantage for publicly accessible installations. The small ceiling clearance of approx. 6 cm also ensures inconspicuous, space-saving installation.
The mount is suitable for both professional continuous use and simple project installations - from technical rooms and training facilities to catering and event spaces.

Material: steel / aluminum
Color: silver
Max. Load capacity: 20 kg
Inclinable: +/- 15°
Rotatable: 360°
Ceiling distance: approx. 6 cm
Suitable for hole spacing: 16-33 cm diagonal
With safety lock system
Easy installation
