All-Flash, 32TB Massive Data Storage: Equipped with four M.2 NVMe slots for SSD, this all-flash NASync offers blazing fast read/write speed and has a maximum storage capacity of up to 32TB. And supports JBOD/Basic/RAID0/RAID1/RAID5/RAID6/RAID10 RAID levels. Store thousands of HD movies, pictures, and documents, Making NASync a movie library, photo album, and file storage space all in one.

One, All-Inclusive App: Rather than downloading individual applications for specific functions, the NAS App incorporates these functions into one place. Access Storage Manager, Files, Photos, and more, all from one convenient location. (Please follow the instructions to upgrade the firmware for a better experience.)

Professional Data Security: Compared with cloud drives, NASync allows users to store massive personal data in trusted local devices, preventing leakage and surveillance to the greatest extent. Data transmission and accounts can be fully protected with professional encryption and multi-factor authentication.
