Petkit Eversweet Ultra Fountain (Gray)

The PETKIT Eversweet Ultra combines a 1080p HD AI camera, a smart hydration monitoring system, and an advanced water filtration and separation system, ensuring not only that your pet has constant access to fresh water but also helping you monitor its daily habits. The 5-liter capacity is enough for one cat for up to about 15 days, which significantly reduces the need for frequent water refills. The fountain recognizes up to 15 pets, generates detailed drinking reports, automatically maintains the hygiene of the water system, and operates exceptionally quietly—at just 26 dB. Support for 2.4 GHz and 5 GHz Wi-Fi ensures seamless connectivity with modern routers and convenient access to all features via the app.

Smart health and hydration monitoring

The built-in 1080p HD AI camera with a 140° wide-angle view offers 24/7 live streaming and infrared night vision, so you can see if your pet is using the fountain and observe their behavior at any time. The facial recognition system identifies up to 15 cats and dogs, allowing for individual tracking of

drinking habits in homes with multiple pets. The app records the time, frequency, and amount of water consumed, then generates daily, weekly, and monthly reports. In the event of sudden changes, such as no drinking for two days, the device sends a notification, which can help with the early detection of health issues, such as urinary tract infections.

Live View and Video Playback

24/7 live view lets you monitor in real time whether your pet is using the fountain regularly and staying properly hydrated. This is a practical feature, especially when you spend many hours away from home or want greater control over your pet's health. The playback feature for recorded videos (requires an active subscription) lets you review past footage and analyze your pet's behavior at the fountain in greater detail.

Hygienic system for separating clean and dirty water

The PETKIT Eversweet Ultra uses an advanced separation system in which used water is directed to a separate 1.8-liter dirty water tank. This ensures that the 5-liter container always contains fresh, clean water. The drinking tray is made of 304 stainless steel, which makes it easy to keep clean, increases corrosion resistance, and ensures a high level of hygiene every day.

Automatic Refilling and Self-Cleaning

The device independently monitors the water level in the 350-ml bowl and automatically refills it as needed. You can set a schedule for automatic emptying and rinsing of the tray, reducing the need for manual operation. Additionally, the fountain offers a deep-cleaning function for the internal water lines using boiling water—the entire process takes 5 minutes and is initiated via the app.

Flow modes tailored to your pet's preferences

The Eversweet Ultra model offers three water dispensing modes—continuous, intermittent, and motion-activated. This allows you to adapt the fountain's operation to your pet's habits while optimizing energy and water consumption. Settings are customized via the mobile app, which also lets you manage schedules and privacy settings, including turning off the camera.

Two-way communication with your pet

The built-in microphone and speaker let you talk to your pet from a distance. This practical feature allows you to calm your pet or call them to the fountain, even when you’re away from home.

Quiet operation and durable construction

The fountain operates at a volume of just 26 dB, so it won’t disturb the peace of your home or your sleep. The construction uses 304 stainless steel and durable ABS, PP, and PPO plastics, which ensure high resistance to daily use. Dimensions of 304 × 290 × 353 mm allow you to conveniently place the device anywhere.

Manufacturer	Petkit
Model	Eversweet Ultra
Color	Gray
Material	304 stainless steel, ABS, PP, PPO
Dimensions	304 × 290 × 353 mm
Capacity	Clean water tank: 5 L Waste water tank: 1.8 L
