## R5,950

### Euhomy IM017 20kg ice cube maker (black)

Are you looking for an ice maker that will provide you with constant access to ice without tedious operation and long waiting times? The Euhomy IM017-N model is a great choice for the kitchen or family gatherings. The device can produce up to 20 kg of ice per day, and the first cubes appear just 7 minutes after start-up. What's more, it offers a self-cleaning function and, thanks to its compact design, it doesn't take up much space.

### Nugget ice cubes

The IM017 produces nugget ice – distinctive, small, and slightly porous cubes that quickly cool drinks. This type of ice is extremely popular in cafes and restaurants – now you can have it at home too. They are perfect for lemonades, cocktails, and iced coffee. They are also gentler on your teeth than hard ice cubes.

## Easy to use and automatic cleaning function

The Euhomy IM017-N ice cube maker is very easy to use. The control panel has only three touch buttons and LED indicators that inform you when there is no water, the tank is full, or the operating mode. Importantly, the device has an automatic cleaning function – just press the "Clean" button to start a 20-minute self-cleaning cycle. This keeps the inside of the ice maker clean at all times, without the need to manually wash hard-to-reach areas.

## Compact, refined design

The Euhomy IM017-N does not take up much space. It has compact dimensions of 24.4 × 34 × 37.6 cm and an elegant design with a brushed metal casing. It fits perfectly into a modern kitchen and can be placed on a worktop. In addition, the 1.8-liter water tank can be easily removed and filled directly under the tap. This means you don't have to move the entire ice cube maker.

## Included in the set

- ice cube maker
- ice scoop
- user manual
