

InLine USB-C Fingerprint Scanner, Windows Hello compatible

Model: 41360D

Manufacturer: INLINE

EAN: 4043718301447

Product Code: 467491

R1,312

The InLine® USB Type-C fingerprint scanner offers a modern, convenient and secure way to log in to the Windows operating system – without the hassle of entering passwords. With this handy device, you can unlock your computer effortlessly and in seconds by simply placing your finger on it. Thanks to the Windows Hello sign-in function (available in Windows 10 and later), your fingerprint is used as a key, significantly increasing both security and user-friendliness.

The integrated fingerprint sensor, measuring 12 x 5 mm, recognises your fingerprint precisely and reliably – and in less than 0.5 seconds. This makes long waiting times and complicated password entries a thing of the past. The scanner can process up to 10 different fingerprint profiles, making it ideal for use in families or offices with multiple users.

With compact dimensions of just 21 x 22 x 9 mm, the fingerprint scanner fits unobtrusively into your
