A smart, professional room scheduling panel

Jabra Scheduler makes finding and booking meeting rooms fast and frustration-free. With an integrated lightbar and intuitive touchscreen, it’s certified as a Microsoft Teams panel and a Zoom Rooms scheduling display. Easy to deploy, simple to scale, and built to unlock more productive meetings across your workplace.

No more “Is this room free?”

Your team’s got places to be and things to discuss. The Jabra Scheduler makes sure they can get on with it - without hallway bottlenecks or doorway diplomacy. Book rooms in advance or on demand. Check availability at a glance. And give everyone instant clarity on room status from your diary or ad hoc at the panel. It’s quick. It’s intuitive. It’s everything room scheduling should be.

Get a room

With a color-coded lightbar visible from a distance, the Jabra Scheduler makes it easy to spot available spaces without stopping to check. The clear touchscreen shows the current room status and what’s coming up next - so teams can move quickly, without knocking on doors or peeking inside. Save time. Meet faster. Make better use of shared spaces.

Set up your way

Whether you’re wall-mounting flat or angled, installing on glass walls or posts, or switching things later - the flexible mounting system makes it easy. The mount is included in the box and integrated cable management ensures a tidy set up. Just install, connect, and get up & running fast.

One platform. Every room.
Want to optimize your space? Get real time visibility and management of your devices so you can maximize the value of your meeting spaces. Now you can centrally manage and update the Jabra Scheduler alongside all your other Jabra video devices in Jabra+ without the legwork. Work smarter across every room, everywhere.

Seamless integration with your current setup
