The display always shows you which ports are currently in use and how much current is being transferred via the 20 watt Power Delivery port during charging. Devices such as smartphones, tablets, and storages can easily be connected and exchanged via Plug & Play.

Engineered for enduring performance

With the included 36 W power supply, you enjoy reliable and fast charging power and 7 ports. The charg- ing function of the last port enables charging with up to 20 W. And even without an external power source, you’ll always be well-connected via the first six USB-C ports.

- Sevenfold expansion from one USB Type-C port: For quick and easy expansion of a USB-C port, the hub offers seven additional ports with data transfer rates of up to 10 Gbit/s
- 20 W charging port: In addition to data transfer, the lowest of the seven USB Type-C ports also offers blazingly fast charging of a device. This keeps you always on a good battery level at work (Attention: power supply unit required)
- Integrated display: The integrated display provides a quick and clear overview of the active ports and the currently transmitted charging power. So you are always in control
- Plug & Play: All ports feature Plug & Play, allowing you to work smoothly without having to constantly disconnect the connected device from the PC before you need to unplug it
- Full power with power supply: Seven ports are available for mobile use without external power connection. With the included 36 W power supply, your connected devices will never lack power and you can access all additional ports
