DISPLEX Smart Glass is a combination of conventional protective glass and extremely thin, flexible, virtually indestructible protective film. With a surface hardness of 9H, it offers very good protection against scratches and other damage. At the same time, with 0.25mm, it is ultra-thin, resistant, flexible or bendable and therefore almost indestructible. The DISPLEX Smart Glass is manufactured with the latest laser technology in our production facility in Straubing, Germany, and is precisely adapted to the contour of the smartphone display - Made in Germany. The unrestricted functionality, colour brilliance and case compatibility are of course guaranteed.

Case-friendly

Our Displex protective glass is manufactured to within 5/100 mm of the smartphone contours and therefore fits perfectly on your smartphone. In addition, the protective film is ultra-thin at 3mm. This means that all standard-sized protective cases can be used with the screen protection glass Thus, your smartphone is optimally protected all around by a combined protection of the Displex Tempered Glass and your favourite case.

Anti fingerprint coating

The top layer of our 4-Layer Technology is a high-tech plasma coating. With an extremely long-lasting effect, this coating effectively repels fingerprints. In addition, the plasma coating guarantees a soft scrolling experience. This technology not only makes your display look better, but it also keeps it cleaner and therefore requires less frequent cleaning.

High-performance adhesive

Once the protective glass has been fitted, the high-performance adhesive ensures optimum adhesion properties and a clear look. The adhesive is adapted to all display coatings of the various manufacturers so that the protective film for mobile phones holds reliably in the long term. The visual appearance is not affected either: despite the screen protection film, you can enjoy gripping videos and photos with maximum transparency and colour fidelity.

Simple & bubble-free application

With the EASY-ON® Stickers and the accompanying video tutorials, mounting the Tempered Glass is incredibly quick, easy and precise. The result is worth seeing: no crooked positioning of the screen protector on the display, no hidden openings for speakers or microphones and certainly no bubbles under the protective glass.
