The AC7092 features Gigabit LAN. In most offices, Gigabit LAN is used to connect to the corporate network rather than the Wi-Fi network.

The built-in USB hub provides a USB-A 2.0 port for connecting peripherals, such as the receiver of your wireless keyboard and mouse and a USB-A 3.0 port for connecting a USB drive. Additionally, the multiport dock also has a USB-C 3.0 port, so you are ready for future products. The 3.0 ports offer SuperSpeed USB 5Gbps for transferring data to and from an external SSD or USB adapter. The built-in card reader accepts SD and Micro SD cards.

Supports Power Delivery pass-through

A USB-C port can generally support data, video, power or a combination of the three. If your notebook has a USB-C port that supports all three: data, video and power, the PD pass-through port on the AC7092 can be used to charge your laptop. Once connected to the multiport dock, the laptop is powered through the USB-C Power Delivery pass-through port, which is powered by the laptop’s USB-C power supply.

Portable aluminium design

The AC7092 is a compact yet versatile device with a rugged aluminium body. Perfect for taking along in your laptop bag.
