

# ICY BOX IB-MAG103B-T Boom microphone stand

Model: IB-MAG103B-T

Manufacturer: ICY BOX

EAN: 4250078172055

Product Code: 761115

## R1,821

The IB-MAG103B-T features high-quality aluminium construction, internal springs and integrated cable management to give you a professional studio-quality experience. The internal springs provide effortless 360° adjustment, so you’re ready for any application. Whether it’s game streaming, podcasting or broadcasting, this is a perfect solution that will go down as well with you as it will with your audience.

## Flexible

The microphone arm offers a flexible microphone position that can be aligned according to your wishes. This is helped by the 360° rotatable boom, which is also equipped with a rotary knob for fixing the desired position.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The foldable scissor arm allows for compact storage as well as easy transport of the microphone arm.

## Everything under control

The microphone arm can be securely attached to the desk top in two ways. If your desk has a recess, you can attach the monitor arm to the desk top using the desk grommet. Otherwise, use the clamping foot. In both cases, the tabletop thickness can vary from 10 to 60 mm. The accessories are included in the scope of delivery.

## For almost any microphone

The IB-MAG103B-T comes with a 3/8 and 5/8 universal thread connection. This means you can easily attach almost any common microphone to the thread. A plus are the double suspension springs in each arm segment, which protect the microphone from falling down or shocks.
