Sony FAWRR1.CE7

Model: FAWRR1.CE7

Manufacturer: SONY

EAN: 4548736039025

Product Code: 992219

R5,581

Wireless Radio Receiver

Easily connect wireless radio commander and flashes

Enjoy the confidence and flexibility of radio wireless flash and camera triggering, even in bright lighting conditions or around obstacles, making difficult shots and wide shooting areas (30 m) easier. The FA-WRR1 wireless radio receiver allows reliable triggering when combined with the FA-WRC1M wireless radio commander.

Effortless pairing with wireless radio commander

Pairing multiple FA-WRR1 radio receivers to the FA-WRC1M wireless radio commander is designed to be quick, so you can spend less time setting up, and more time getting shots. Simply hold down the receiver power button for a few seconds to enter pairing mode, then add each receiver to the radio commander.

Wireless capabilities that go the distance

The FA-WRC1M wireless radio commander and FA-WRR1 wireless radio receiver feature a maximum range of 30 m (98.4 ft) so you can flexibly create multiple wireless flash setups over an expansive area, including having the flash positioned behind the camera in a way that would be impossible with a conventional infrared system.

Flexible flash shooting modes

Combine multiple receivers (up to 15 receivers, within up to 5 groups) for accurate wireless transmissions. Easily control multiple flash units for more creative lighting options, with a minimum of equipment.

Remotely trigger multiple camera shutters

Use multiple cameras to simultaneously shoot subjects from different angles. Use VMC-MM1 Multi Terminal connecting cables (sold separately) to connect multiple receivers to multiple cameras, and the FA-WRC1M wireless radio commander to simultaneously trigger multiple remote camera shutters.

Commander for off-camera flash control

Use with the FA-WRC1M wireless radio commander for multiple off-camera flash setups.

For remote release function

Use with VMC-MM1 Multi Terminal connecting cables for the remote release function.

Compatible flashes

The FA-WRR1 Wireless Radio Receiver is currently compatible with the HVL-F60M, HVL-F43M, and HVL-F32M flash units.
