The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Roamii BE Lite offers seamless connectivity with a single network name (SSID), allowing you to enjoy uninterrupted streaming of AI-based applications or gaming on your handhelds while you move throughout your home.

Powered by WiFi 7, Roamii BE Lite delivers high-speed dual-band connectivity that ensures seamless and low latency internet access in every room.

Ultra-fast 2.5 Gbps wired connection

The Roamii BE Lite offers one 2.5Gbps and two 1Gbps Ethernet ports, with option to operate as mesh backhaul or high-speed wired connections. These Ethernet ports ensure a zero-lag experience for bandwidth-intensive needs, allowing for minimal interruption while you immerse in online entertainment.

Simple, right at your fingertips

Easily set up your mesh system with the intuitive Roamii app, which will also alert you to any security events.

Home Network Protection

Activate Fortisecu in the Roamii app, to scan threats and protect all connected devices, including phones, computers, TVs, game consoles, and other IoT devices.

Parental Controls

Setup a profile for your kids’ devices and Fortisecu can help manage and schedule access internet, and block harmful content.

Separated Networks

Set up individual networks for child, guest, and smart home devices that isolated from others for better protection and easy management.
