Netatmo Pack: 3 Additional Smart Radiator Valves

Model: NBU-NAV-EU

Manufacturer: NETATMO

EAN: 3700730503433

Product Code: 1052847

R8,166

Adjust the temperature of each room to suit your needs

Heat your home to just the right temperature, where and when you need it. Control the temperature even more closely with Additional Radiator Valves and the room-by-room heating schedule. Do you leave home at 9am and get back at 6pm? You can turn the heating up in the bathroom in the morning and down when you leave. You can make sure your living room is cozy when you come home and your bedroom is a comfortable 19°.

Comfort or Economy Mode? The choice is yours.

Additional Radiator Valves and the Netatmo Smart Thermostat make the perfect team. Why? Because they allow you to choose between two heating modes. Comfort Priority tells Radiator Valves to heat certain rooms to a temperature higher than the Thermostat. Eco Priority tells them to limit the temperature.

Is a window open? Avoid energy waste

Netatmo Radiator Valves have a useful smart feature that's really something. Open Window Detection automatically switches radiators off in a room where windows are open. They're switched back on when the windows are closed. The advantage? Zero effort but big energy savings.

Your heating system adapts to the weather, your home and each room

Netatmo Radiator Valves adapt to the weather and your home's insulation in real time with the Auto-Adapt feature. They adjust radiator heat to guarantee the right temperature at the right time. Want to set your living room to 20°C? Consider it done! If you have more than one in the same room, Smart Radiator Valves can be synchronized to make sure the room is heated evenly.

Adjust your radiator heat, wherever you are

Control your radiators using the Energy app on your smartphone, tablet or computer. Heading home sooner than you thought? Reprogram your heating to switch on before you get in. Thanks to Apple HomeKit, Alexa and Google Assistant compatibility, you can control your Radiator Valves with your voice. It's no sooner said than done! Alternatively, you can adjust them manually.

Simple to install and use

All Netatmo equipment is designed to be easy to install and use. It takes less than 20 minutes to install each Additional Smart Radiator Valve. No technical expertise required: our guides and videos will walk you through the process. If you already have radiator valves, you can simply replace them with Netatmo valves, even with the heating on.

Equipment adapted to your home

Netatmo Smart Radiator Valves are compatible with more than 90% of radiators. Still not sure? Check compatibility on check.netatmo.com. Adapters are supplied with each Smart Radiator Valve to fit the thermostatic valve body of your radiators.

Designed to blend into your decor

Smart Radiator Valves are designed to make your life easier - not harder! With a minimalist design by Philippe Starck and a choice of four adhesive strips in different colors, Smart Radiator Valves blend into your home decor.

Control all your radiators for even greater efficiency

Good news! Your smart heating system can control up to 20 Smart Radiator Valves. You just install
