EAN: 7640124890731

Product Code: 1054884

R1,671

Peach A4 Thermal Binder - PB200-70

The thermal binding system from Peach is a modern adhesive-bonding process. The adhesive in the binding cover's spine is heated within the unit until it assumes fluid form and bonds to the pages. Peach Thermal Binder Systems endow your documents with a professional appearance while simultaneously offering fast and easy operation: No need to punch holes in the pages, and it is also possible to bind several covers at the same time.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
