R1,062

"Our innovative cable organizer with zero RU - the PATCHBOX® Patchcatch (0RU) - can simply be mounted under the mounting brackets of switches and patch panels. It doesn’t need any additional space in a network cabinet compared to conventional horizontal cable management.

All patch cords are guided to the side of the RU they are patched to keep the cabinet nice and tidy. No more crossing and cable spaghetti!

The PATCHBOX® Patchcatch works with conventional patch cords as good as with the PATCHBOX®. A great alternative to conventional cable management.

It works with our Cat. 6a as well as for our fibre optic patch cords. Every PATCHBOX® already comes with 6 PATCHBOX® Patchcatches included."
