The AXAGON PCEM2-XS internal adapter allows connecting an NVMe M.2 SSD disk to a desktop computer using a PCI-Express bus. Its high-quality workmanship, compact size, attractive design, and sophisticated cooling make this adapter an ideal choice for upgrading a desktop computer not equipped with an M.2 slot.

The adapter supports the use of single-sided and double-sided NVMe (PCI-Express) M.2 SSD drives. The reduction does not have a limit of SSD disk capacities and M.2 cards with dimensions of up to 22x80 mm can be used.

Thanks to the PCI-Express interface, it is possible to achieve maximum transfer speeds. The LED indication indicates connection or data transfer in the M.2 slot.
