The LevelOne POI-3014 is a Power over Ethernet (PoE) injector that not only delivers a cost-effectivesolution for power distribution, but also provides a seamless way of deploying Powered Devices (PDs) onexisting LAN infrastructure.

With the use of power injectors, DC power of up to 30W and the data that comes from a non-PoE switchare merged together and then transmitted to a PD such as a PoE network camera, through the Ethernetcabling. This allows you to extend the use of your existing hardware investment without needing to buyextra PoE switches.

Furthermore, non-PoE devices like wireless access points can also be powered up remotely by addingadditional PoE splitters, since power and data are further split into two cables. These devices
