

LevelOne Gigabit PoE Repeater, Cascadable

LevelOne Gigabit PoE Repeater, Cascadable

Model: POR-0120

Manufacturer: LEVELONE

EAN: 4015867174920

Product Code: 1055896

R4,656

For system integrators looking for a professional solution to help extend their PoE network, POR-0120 is the perfect accessory to increase your Power over Ethernet network performance. LevelOne POR-0120, a 1-Port Gigabit PoE Repeater requiring neither configuration nor electrical power, is an innovative transmitter to pass on both data and power extend to another 100 meters. The delivery though one PoE port and one non-PoE port are adequate to extend network devices such as WLAN Access Points, Network Cameras and other appliances with high-speed to the network for greater deployment flexibility.

PoE Compliance

Our device features PoE (Power-over-Ethernet) capability, which carries electrical power along with data in a safe way using Ethernet cabling. Thus providing great cost savings by eliminating the need for additional power cables and outlets. In addition, it enhances flexibility, for instance, you can set up a PoE wireless access point in close proximity where the reception is better.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Easy Deployment

No software installation is required. Simply just plug and play as no external power supply is needed, due to all electrical power comes from the PSE (Power Sending Equipment), for instance, it could be a PoE Gigabit Ethernet Switch. Therefore the power source is centrally managed from one location easily and efficiently.

Scalable Design

LevelOne network devices are the perfect solution to help you extend your existing PoE network.

Normal

Ethernet cable, for example the cat5e standard, runs up to 100 meters, but with the installation of a single PoE repeater can increase the distance up to 200 meters. Furthermore, you can triple your range or even more by daisy-chaining multiple PoE repeaters.
