LONG RUNTIME

The Dreame V12 Mistral's high-performance battery runs for 90 minutes in normal mode on a single charge

DIGITAL SCREEN WITH TRIGGER LOCK

The Dreame V12 Mistral features a digital screen that includes an option to lock the trigger, improving the user's experience for easier and more comfortable cleaning.

Its high-quality TFT LCD (Thin Film Transistor-Liquid Crystal Display) digital screen provides information about the product's status in real time and allows the user to monitor the battery life, filter status and suction power.

5-STAGE FILTER SYSTEM WITH HEPA 12 CYCLONE FILTER

Dreame V12 Mistral incorporates a highly-advanced five-filter system with an added HEPA filter. While the H12-grade HEPA filter screens fine dust particles of less than 0.3 mm in diameter, the other filters remove microscopic dust, separate large particles and block pollutants.

Its 12-cyclone filter system separates and reduces dust particles, also reducing the filter load by 63%. In this way, the useful life of the filter is doubled compared to previous models.

7-STAGES NOISE REDUCTION

Dreame has developed an innovative noise-reduction system using sound-absorbent materials. Its acoustic-absorption foam means the experiencing of vacuuming is three times quieter than that of other vacuum cleaners.

TRIGGER LOCK SYSTEM

With the Dreame V12 Mistral, there is no need to hold the trigger as you vacuum. The trigger lock option improves the user's experience for easier and more comfortable cleaning.

MULTIPLE ACCESSORIES

Dreame V12 Mistral includes different accessories for precise and personalised cleaning of different surfaces. Its anti-dust mite attachment removes both dust particles and allergens from all kinds of upholstery.

LIGHT ERGONOMIC DESIGN

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The motor and battery of the Dreame V12 Mistral have been manufactured with an ergonomic design in order to locate them at the end of the vacuum cleaner. This makes it easier to handle, for comfortable, effortless cleaning in high and inaccessible places.

EASY TO EMPTY

The system for emptying the dirt deposit is easy and hygienic. Dirt can be ejected without coming into contact with it, at the press of a button.

The deposit has a capacity of 0.5 litres.

WARRANTY

Dreame Europe markets MISTRAL models exclusively to Europe. They include a two-year warranty and quality, personalised technical and customer support service.
