

Flytec V010 5200mah bait boat

Model: V010-5200mah

Manufacturer: FLYTEC

EAN: 5907085523996

Product Code: 1079160

R3,582

Flytec V010 5200mah bait boat

The bait boat is equipped with a dual GPS+BDS module, which allows you to save multiple points on the map and automatically navigate between them. This ensures that you will always get to the exact spot you want, regardless of weather conditions. A smart return function will bring the boat back in a low charge or signal loss situation.

Powerful power and smooth steering

Two high-speed motors and three-bladed propellers provide plenty of power and reliable handling. The streamlined shape of the hull reduces drag, and the drive's quiet operation does not scare fish. The boat's stability guarantees full control even under heavier loads.

Three independent bait chambers

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The model has three separate silos that can be operated independently. This allows simultaneous baiting and hook feeding, as well as better distribution of bait in several places. Automatic center of gravity correction prevents tipping, even when only one chamber is loaded.

Powerful lighting for night fishing

Dual navigation lights - front and rear - provide visibility both on cloudy days and at night. This makes it easy to locate the boat in the water and you can fish comfortably at any time.

Intelligent cruising and control system

The ergonomic remote control with LCD screen allows you to conveniently steer at a range of up to 500 meters. The automatic cruise function allows you to maintain a constant speed without having to constantly operate the rods. This saves energy and makes operation more comfortable.

Modern safety system

The boat automatically returns to the starting point when the energy level drops or the signal is lost. This solution ensures that the equipment will not be lost even in difficult conditions.

High functionality for demanding anglers

The improved shape of the Y-Notch chamber makes it easier to hook up the hook, thus increasing fishing efficiency. Robust ABS plastic construction ensures resistance to damage and reliability during long use.

Included

- Bait boat
- Remote control with LCD screen
- Rechargeable battery
- Mains charger
- Propellers (2 pieces)
- User manual
