True 4K (3840 x 2160) UHD with 8.3 million distinct pixels captures every strand of hair and fabric detail with subtle highlights and rich texture, enhanced by HDR10 for stunning contrast and scenic depth.

The Big Benefits of Short Throw

Requiring minimal distance to project big-screen images in tight spaces, short throw projection also frees up usable floor space without casting shadows onto the screen.

Indulge in Immersive Sound

Upgraded with super wide frequency range for deep bass and soaring highs, TK700ST's 5W chambered speaker leverages BenQ's audio-enhancing technology with exclusive EQ algorithms for pure clarity and immersive sound quality.

World's Lowest Input Lag

Ultra-fast 4ms* low input lag translates your sight, hearing, and thoughts into action without delay.
(* 4ms input lag in 1080p@240Hz, 8ms in 1080p@120Hz, 16ms in 4K@60Hz)

Enhanced Black Details

Detect and react faster to approaching dangers with BenQ-exclusive Black Detail Enhancement, which highlights fine details in dark scenes while preserving color performance in brighter areas.

2D Keystone

2D Keystone removes trapezoid effects when projecting from different room locations, providing ease and convenience.

Projection Distance

The 1.2x zoom maximizes available space with a range of throw distances for big-screen entertainment without the hassle of complex installation.

Picture Rotation

Picture rotation adjustment improves flexibility for projection from uneven platforms.

Expand Your Gaming Universe

BenQ let you game on your own terms. Whether it's a Sony PS5/PS4, Nintendo Switch, or Xbox Series X/S, dual HDMI 2.0 universal connectivity has you covered. (HDMI 2.0b is 4K@60Hz / 1080p@120Hz compatible for gaming)
